

ESP-9V SERIES

Battery-Operated Irrigation Controller

RainBird® ESP-9V controllers let you irrigate with precision, without AC power. And with one-, two-, four- and six-zone models,* this series will meet the needs of any project.

*Four-zone model only available in select regions.

WHAT SETS RAIN BIRD APART

Harsh conditions are no match for the ESP-9V. This controller will work even when fully submerged in dirty water.

Performance, Battery Life and Warranty

- Comes with an industry-leading 5-year warranty
- In third-party durability and life cycle testing, the ESP-9V outlasted the competition
- Key controller components are IP68 certified for protection against dust and water
- The ESP-9V operates for at least 2+ years when equipped with two 9-volt alkaline batteries

WHEN TO USE THE ESP-9V

Fit for both permanent and temporary irrigation needs, the ESP-9V saves you time and money because there is no need to run wire, obtain construction permits or dig under hard-scape elements. Here are several examples of when the ESP-9V makes for the perfect solution.

- As temporary irrigation on construction sites, traffic medians, greenhouses and more
- As an interim solution while a wire install or repair is being completed
- On sites that need to follow municipality electricity regulations or codes
- In specialty irrigation projects, such as a green wall

WHERE IT CAN BE INSTALLED

The ESP-9V conveniently fits in valve boxes and offers various wall mount orientations, which makes installation of specialty irrigation projects easier.

JOIN THE GREEN TEAM

When you choose Rain Bird, you become part of a larger irrigation community. One that helps you start your landscaping projects off right, get new hires up to speed and get rewarded for using our products and services.
